INFORMATION PAPER

DAMI-ISH
15 Mar 84

SUBJECT: CENTER LANE Operations (U)

ISSUE. ACSI question during 23 Feb 84 In Process Review (IPR) concerning when INSCOM was tasked to do application work (vice R&D activity) (S/CL-1/NOFORN).

FACTS.

1. (S/CL-1/NOFORN) DAMI-ISH files indicate that OACSI interest in Psychoenergetics lay in military application from the beginning of our involvement.

a. (S/CL-1/NOFORN) A 6 Aug 78 Information Paper for the ACSI to present to CSA recommends "That the Army develop a rational, comprehensive program to examine military applications of Psychoenergetics, and that OACSI have DA Staff proponency."

b. (S/CL-1/NOFORN) A 1 Sep 78 plan for the immediate future listed as goals the collecting of intelligence on opposing enemy forces and the development of countermeasures to possible enemy use of psychic phenomena.

d. (S/CL-1/NOFORN) And finally, an 18 Jun 79 ISH paper states that "The Army program is, initially, to verify the phenomena" with DARCOM and INSCOM participating. INSCOM was to "... attempt to apply remote viewing to intelligence collection."

2. (S/CL-1/NOFORN) INSCOM agreed to participate in the project on 11 Oct 79 and on 4 Sep 79 conducted their first operational RV session against a missing AGE aircraft at the direction of OACSI. The INSCOM success on this task lead to other operational taskings by OACSI and by 22 Jul 80 an ISH paper reflects that tasking has been expanded to include "... a select number of cleared consumers, including the CIA and the DOD Iran Task Force."
